

In 10 weeks, you will be on your way to a successful career as a Web Developer!

Learn the fundamentals of modern web development to build great websites, software, and apps. We will teach you how to build modern, in-demand software that runs on any browser flawlessly.

# DEEP DIVE FULLSTACK WEB DEVELOPMENT

The internet is what connects us all and the world wide web is how we access everyday tools and resources such as social media communication, email, etc. In a world where we are evermore connected via the internet, we are in great need for web developers to build and manage applications. For example, you can work as a freelance developer helping businesses with their online presence, or build custom application program interfaces (APIs) for companies such as Facebook and Twitter. Building for the web is a great place to start your coding career. This bootcamp focuses on a foundation in the JavaScript stack plus the latest technologies including React, HTML, CSS, Git, MySQL, and software architecture principles.

Apply today to be contacted by a Program Manager who can help you qualify for financial assistance.

## Introduction and Discovery (Weeks 1-2)

- Discover the components of coding and how the various parts work together to make web applications run.
- Become familiar with the various technologies used in modern web development.
- Build a technical resume and a professional online identity for the tech industry.
- Settle into your routine of coding all day and on nights and weekends at home.

## Preparation and Development (Weeks 3-5)

- Reinforce your knowledge base through team and individual projects.
- Form teams to design and begin building your capstone project.
- Start building your personal website project to develop your new online presence.

## Execution and Deployment (Weeks 6-10)

- Immerse yourself in your team capstone project.
- Create clean, functional, and documented code. (That's exactly what employers are looking for!)
- Complete resume and mock interviews.
- Complete your personal website project.
- Demonstrate your team capstone projects to employers, staffing agencies and others in the tech community.
